

## ACADEMIC BACKGROUND

### Virtual University of Burkina Faso

Master's in Data Mining and Artificial Intelligence

2019 – 2021

Ouagadougou, BF

### Aube Nouvelle University

Bachelor in Computer Engineering Technology

2015 – 2018

Bobo-Dioulasso, BF

## PROFESSIONAL EXPERIENCE

### Uduma, Odial Solutions Group

Senior Technical Lead Data, AI & Integrations

Sept. 2025 – Ongoing

Ouagadougou, BF

- Defining and deploying the data strategy and system architecture to ensure reliable and automated collection, processing, and analysis of operational and commercial data.
- Supervising the technical integration of heterogeneous systems (mobile applications, cloud solutions, web platforms, APIs) and managing the gradual migration from existing tools.
- Designing and developing advanced data solutions and AI engines for demand prediction, infrastructure anomaly detection, and field operations optimization.
- Supervising and strengthening the skills of local technical and data teams in the three countries of operation, promoting autonomy and scaling internal capabilities.
- Ensuring the scalability and performance of the data ecosystem to support business growth and the geographic expansion of drinking water access projects.

### Muraz Centre, National Institute of Public Health

Data Manager

Jul. 2022 – Jun. 2025

Bobo-Dioulasso, BF

- Led data operations for the Afroscreen project, ensuring integrity, security, and accessibility across public health surveillance systems.
- Developed and maintained scalable ETL pipelines to automate the integration of laboratory, field, and genomic data.
- Built interactive dashboards using Power BI and Tableau to track key epidemiological KPIs and support real-time policy decisions.
- Managed a multidisciplinary data team (statisticians, data managers, collection agents), fostering collaboration and capacity building and worked cross-functionally with technical, clinical, and policy stakeholders to streamline data flows and enable evidence-based interventions.

### Kreezus SAS

Machine Learning Engineer

Jun. 2021 – Jul. 2022

Ouagadougou, BF

- Collaborated with technical leads and business units to translate operational needs into machine learning use cases with measurable development impact.
- Integrated large language models (LLMs) and NLP pipelines for knowledge extraction from unstructured policy and financial documents.
- Developed reusable MLOps workflows with CI/CD pipelines for model training, validation, and deployment on cloud-native infrastructure.
- Contributed to AI strategy, including model governance, ethical AI standards, and responsible use frameworks aligned with public-sector accountability.

- Conducted in-depth analysis and reporting of resource usage on Huawei core network equipment to support capacity planning.
- Assist the planning and deployment of the 4G core network infrastructure for TELECEL FASO in collaboration with national stakeholders.
- Monitored and optimized network performance parameters to ensure high availability, low latency, and secure connectivity.
- Performed log analysis and proactive detection of security incidents across core systems to support network integrity.

## TECHNICAL SKILLS

**Data Architecture & Engineering** Kafka (real-time ingestion), Spark (batch & streaming), PostgreSQL, MongoDB, Redis, PGVector, Data Lake architecture, Talend / Apache NiFi / Airflow, Azure Data Factory, AWS Glue, data governance, data security

**Data Products & APIs** Design of modular AI products (LangChain, LangGraph), RESTful APIs (FastAPI, OpenAPI), RAG pipelines, A2A integration, service orchestration, performance tracking (LangSmith, MLflow), industrialization of analytical solutions for client-facing use cases

**Data Science & AI** Python (Pandas, scikit-learn, PyTorch, XGBoost), statistical modeling, feature engineering, fine-tuning of Transformer models, intelligent agent development (certified Hugging Face Agents & MCP), model evaluation, MLOps

**Visualization & Business Analytics** Power BI, Tableau, advanced SQL, Matplotlib, Seaborn, Plotly, Dash, KPI reporting, business-oriented analytics dashboards

**Full-Stack Product Development** React, TypeScript, TailwindCSS, user interface development for data products, front-end / back-end integration, product-focused UX/UI

**DevOps & CI/CD** Docker, Kubernetes (basic), GitLab CI/CD, cloud-based deployment management, service monitoring, version control and continuous delivery best practices

**Methodology & Collaboration** Agile (Scrum, Kanban), multi-project management with Jira / Trello, product documentation, cross-functional collaboration (tech, business, product), client-centric mindset

## SOFT SKILLS

**Leadership & Communication** Team Leadership, Data Evangelism, Storytelling, Facilitation of Project and Technical Teams, Effective Communication (Bridging IT, Data, and Business Teams)

**Strategic Impact & Problem-Solving** Ability to tackle real-world problems with innovative, scalable, and efficient solutions, Presenting Business and Technical Issues, Critical Thinking (Ability to Challenge Business Needs)

**Results Orientation** Ability to Turn Data Projects into Measurable Business Value, Capable of Working Under Tight Schedules and Delivering High-Quality Results Within Deadlines

**Collaboration & Adaptability** Team Spirit and Cross-functional Cooperation (Data Owners, IT Department, Business Teams), Exposure to Agile Development Methodologies and Experience Working in Cross-functional Teams, Complex Project Management (Multi-team, Multidisciplinary, Sometimes Under Pressure)

**Continuous Learning** Permanent Technological Curiosity (Monitoring Data/AI/Telecom Trends), Teaching and Vulgarization (Training or Evangelizing Around Data Culture)

**Languages & Mobility** French (native), English (fluent), international experience (including Canada, Morocco & China), excellent intercultural communication skills

## AWARDS AND RECOGNITION

## **GénieTIC Competition of the Ministry of Digital Economy and Posts**

2016

*Awarded 3rd place*

*Ouagadougou, BF*

- Bronze medal at the 2016 National GenieTIC competition for young startupperes in Burkina Faso.

## **Seeds for the Future program organized by Huawei**

2019

*Recipient of the program*

*Ouagadougou, BF; Shenzhen, CN*

- Two-week training in China (Beijing and Shenzhen) on Chinese culture, Huawei technologies, Big Data, 5G, and the Internet of Things.

### **LANGUAGES**

**French:** Native

**English:** Fluent
